

Core Concepts Demonstrated (page 2:2)

- Implement **Node Package Manager (NPM)** via Node.js
- **Bootstrap**
 - Utilized bootstrap design templates for some interface components
- **HTML**
 - Used to create content for webpages
- **CSS**
 - Used to format and style webpages (still working on developing these skills)
- **JSON Data**
 - Hardcoded JSON data for each product, tag, and User in the Kitchen Story application
